1. Online Content Regulation System 6 Months Support and Maintenance.	<u>Special requirements</u>
<u>COMMENTS:</u> The Online Content Regulation (OCR) system enable our distributors to upload content (Videos and Game Play) online. Once the contents is uploaded, FPB will access the content in OCR to check if it plays and it is audible, then when they are happy, they schedule the classification of the submitted content. The scheduled Classifier will then access the content for a day to view and write a classification report which is quality assured and approved. Once approved, the decision gets sent to OCR for the distributor to see.
